

Hard Rock in collaboration with PACT is proud to announce
a Social Identity Quest, specifically designed for
4th to 6th grade students.

This engaging free resource helps young learners navigate the complexities of
online identity and digital safety in an age-appropriate manner.

<https://socialidentityquest.com/students-start-here/>

Interactive Learning: The quest-game format challenges students to examine
how they construct and express themselves online,
making the learning process both fun and effective.

Ollie the Octopus guides
your students through
common scenarios that
kids face on line.

THINK BEFORE YOU SHARE

Scenario 2: Think Before You Share

You're part of a group chat with friends from school. One day, one of your friends starts sharing personal things about another classmate—stuff they wouldn't want everyone to know. People in the chat are laughing and adding comments, and they even ask you to join in. You feel uncomfortable because it seems unfair, but you're not sure what to do.

 **A:** You decide to join in on the conversation, thinking, "It's just a joke, and I don't want to be left out." You add a comment or two and laugh along with the others, even though it feels a little strange.

 **B:** You feel uncomfortable but aren't sure what to say, so you decide to stay quiet and not add anything to the conversation. You wonder if that's enough to avoid being part of it, but you still feel uneasy about seeing what's being shared.

 **C:** You decide this doesn't feel right, so you say, "I don't think we should talk about them like this," and you leave the chat. You feel better knowing you didn't join in on something that could hurt someone else.

How often do you take a moment to think before sharing something online? Let's look at the next scenario together.

 Listen

I Choose A **I Choose B** **I Choose C**

Critical Thinking Skills: By participating in this quest, students will develop
essential skills to evaluate their online presence and make informed
decisions about what they share on the internet

Safety First: The program emphasizes online safety, helping
students understand the potential risks and long-term
consequences of their digital actions.
